**RECORD OF THE PROCEEDINGS OF LECTURE/PRESENTATION MADE
BY MR. LUC TYTGAT, DIRECTOR OF THE SINGLE SKY DIRECTORATE,
EUROCONTROL ON "EUROPEAN SINGLE SKY POLICY" HELD ON
THURSDAY, 13TH SEPTEMBER, 2012 AT INDIA INTERNATIONAL
CENTRE, NEW DELHI**

Mr. Luc Tytgat gave a presentation on GNSS and Galileo. He also spoke on the development of Single Sky under Eurocontrol.

The European Transport Policy up to 2020 is based on the comprehensive White Papers of 2001 and 2011. The space segment is addressed within the European Space Policy launched in 2007.

Using space assets (EGNOS, GALILEO), Europe is planning to usher in an era of more efficient Air Traffic Management (ATM) to meet the 2030 requirements. The use of new technologies by the entirety of the transport sector is seen by European institutions as a catalyst for economic recovery and further development.

The Single European Sky (SES) is a strategic initiative providing a common framework enabling enhanced performance in terms of safety, capacity, cost-efficiency and environmental impact through the defragmentation of current ATM system. EUROCONTROL is fully committed to support SES implementation.

Director of Single Sky at EUROCONTROL explained how SES implementation is being achieved, including through strengthened coordination in ATM between civil and military.

The presentation and discussion took place over nearly three hours. The session was very interactive and a large number of questions were asked.

The presentation will be available on IFFAAD website.
